• analysing

KES

- Direct mass flow rate measurement of gases
- Measuring accuracy:
±1.0% of full scale
+0.5% of reading
- p_{\max} PN 16, t_{\max} 175 °C
- Fast response time
- No moving parts
- Analogue output and alarm contact

Field of application

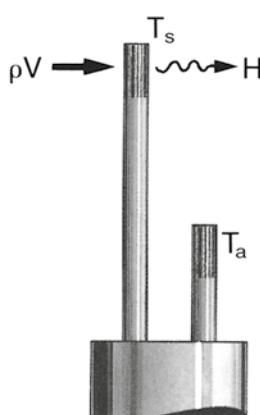

The KES type series thermal mass flow meters measure the flow of gases, independent of variations in process pressure and temperature.

The flow meters are available in different versions for pipe nominal sizes from 1/4" to DN 200, pressures up to 16 bar and gas temperatures up to 175 °C.

Theory of operation

The KES probe consists of 2 sensors: a temperature sensor for sensing gas temperature, and a sensor for measuring flow velocity. This sensor element is heated by the control electronics to a constant temperature difference with respect to the medium temperature.

Energy is transferred to the flowing medium - causing increased current flow through the sensor. The electrical energy required to maintain the sensor at a constant temperature is proportional to the mass flow of the gas.

As the amount of energy transferred is determined by the number of gas molecules flowing past the sensor, the system measures the direct mass rate of flow independent of variations in pressure and temperature.

Measuring ranges

Flow velocity m/s (at 0 °C, 1,013 bar absolute)

Medium	min.	max.
Air	0...4.7	0...94
Ammonia	0...4.4	0...88
Argon	0...6.6	0...132
Carbon dioxide	0...4.9	0...98
Carbon monoxide	0...4.8	0...96
Chlorine	0...4.0	0...81
Biogas	0...4.0	0...81
Ethane	0...3.7	0...73
Ethylene	0...2.9	0...57
Freon 12	0...1.7	0...33
Helium	0...2.9	0...58
Hydrogen	0...2.2	0...44
Hydrogen fluoride	0...4.7	0...94
Hydrogen Sulphide	0...3.8	0...75
Methane	0...3.8	0...75
Natural gas	0...3.8	0...75
Nitrogen	0...4.7	0...93
Oxygen	0...4.7	0...93
Propane	0...1.7	0...34
Propylene	0...2.0	0...39
Sulphur dioxide	0...3.3	0...65

Equation for calculating the flow rate:

$$Q = 900 \cdot \pi \cdot v \cdot ID^2$$

Q = flow rate in Nm³/h (1,013 bar abs., 0 °C)

v = flow velocity in m/s

ID = inside diameter of line in m

$\pi = 3.1415$

Available models

Standard version

with ceramic sensors, for non-aggressive gases such as:
air, N₂, argon, CO, CO₂

- KES-1... insert version with 1/8" stem

Rugged industrial version

which the stainless-steel enclosed sensor is resistant.
Maximum medium temperature 175 °C.

- KES-3... insert version with 1/4" stem
- KES-4... inline version for DN 8 to DN 200

Evaluation electronics

The smart microprocessor-based evaluation electronics provides an analogue output proportional to the flow velocity.

The KES-1... version is fitted with an additional alarm contact; and the KES-3.../-4... version with an interval contact. The electronics may be manually adjusted with buttons, or via an RS-232 serial port with optional Windows™ software.

**Technical data**

Types of gases:	all types of non aggressive gases
Accuracy:	±1 % of full scale + 0.5 % of reading (at 0...50°C and 0.3...2 bar rel.)
Repeatability:	±0.2 % of full scale
Temperature coefficient:	±0.04 % of reading /°C within ±25°C of calibration value ±0.06 % of reading /°C between ±25...±50°C of calibration value
Pressure coefficient:	0.3% / bar for air
Response time:	200 ms (upto indication of 63 % of the real flow rate)
Medium stemperature:	-10...+80 °C
Ambient temperature:	0...50°C
Max. pressure:	8 bar (KES-1)
Electronic housing:	Aluminium, powder coated

Wetted parts

Probe material:	Stainless steel 1.4401
Sensorspitze:	Stainless steel 1.4301 with glass ceramic sensor
Indication:	2x12-digit LC-display, backlit
Counte:	8-digit, with reset
Alarm output:	relay, max. 42 V _{AC/DC} , 140 mA
Analogue output:	0-5 V _{DC} (min. 1000 Ω) or 4-20 mA (max. 700 Ω)
Power supply:	18-30 V _{DC} , max. 625 mA
Protection:	IP 65

Order details insert version (Example: KES-1 010 K N3 4) Indication

Immersion length	Model		Display	Output	Real gas calibration
	Compact version	Separate version			
95 mm	KES-1 010 K	KES-1 010 R	N3 = without display D3 = LC-display	4 = 4-20 mA 5 = 0-5 V _{DC}	without = Standard air A = Argon, Carbon dioxide, Helium, Nitrogen
152 mm	KES-1 015 K	KES-1 015 R			
229 mm	KES-1 023 K	KES-1 023 R
